

Base Package

| Site Development Cost | Monthly Charge |
|-----------------------|----------------|
| \$550.00 | \$40 |

What's Included:

- **Website Development**

What It Is: We will build your site from scratch. Built using HTML and CSS; it will be compliant with all of today's browsers including Microsoft's Internet Explorer, Google Chrome, Mozilla Firefox, and Safari. Since it is HTML/CSS based all sites will be viewable on Apple products as well.

Details: Development includes up to 8 web pages of content and pictures with a standard navigation bar. Additional pages and secondary navigation included at \$50 per page.

- **Email Hosting.**

What It Is: You will have your own email with your domain name. For example: John@mycompany.com. This email can be checked on any computer with an internet connection. No need to configure external email software and a mobile email site is included for viewing on your smart phone.

Details: The base package contains 1 email address with unlimited storage.

- **Domain Management**

What It Is: Your domain is the identity of your website. It is what people type in between the "www." and the ".com" (www.mycompany.com) to get to your website. It is also the word your email address will contain.

Details: Your domain expires yearly, so we maintain it. You never have to worry about renewals or your site being affected.

- **Web Hosting.**

What It Is: The servers/computers that actually store your website.

Details: All servers maintained and configured for over 99.9% uptime.
